Boo and the Garden That Woke Up

A story about watering one small thing and seeing what happens

BOO & CO.

Boo was given a watering can. It was red, it was heavier than it looked, and it was hers.

She watered one flower. Then she watered the same flower again, to be sure. Then she watered her own feet, which was an accident, mostly.

The whole book is ten spreads long and ends with something we are quite proud of. It is at booandco.fun.
